

GO!Domestic is the ideal for contact or call centers and companies that rely on dedicated long distance T1 circuits because it eliminates the local loop component, thereby reducing per minute costs. Broadvox GO!Domestic SIP Trunking, deployed in combination with an IP PBX or legacy CPE, results in significant cost savings when compared to traditional communication systems with separate phone and data connections. GO!Domestic service delivers unlimited concurrent calls, toll-free service and long distance on a network designed and built by a team of world class engineers.

Standard features:

- Discounted long distance calling within the 48 contiguous United States, Puerto Rico, US Virgin Islands and Canada
- Discounted toll-free with one toll-free inbound number
- Unlimited concurrent call sessions (limited only by available bandwidth)
- Codec Support: G.711 and G.729A

Available options:

- Add new or port existing toll-free numbers
- Share SIP Trunk across multiple locations to achieve greater economies of scale
- Inbound load balancing across multiple locations
- Business Continuity

Broadvox also offers DSL, T1 and DS3 connectivity. (Call for a quote.)
